PROFESSIONAL SUMMARY

Full-stack software engineer and Computer Science student at Cal State East Bay with hands-on experience building and shipping a real-time, multi-user desktop application from end to end. Proficient in TypeScript, JavaScript, Node.js, and Express.js on the backend, and React, HTML, and CSS on the frontend. Experienced with user authentication, relational databases, WebSocket infrastructure, and peer-to-peer communication protocols.

EDUCATION

California State University - East Bay

Bachelor of Science in Computer Science.

Hayward, CA

Dec 2025 - Present

Contra Costa College

Associate of Arts, Liberal Arts: Math and Science.

San Pablo, CA

May 2025

EXPERIENCE

Cashier / Staff, Part-Time

Dec 2023 – Jun 2025

DAISO

El Cerrito, CA

- Processed POS transactions across cash, card, and electronic payments while maintaining a professional checkout experience.
- Resolved customer questions and concerns using clear communication, patience, and calm de-escalation in high-traffic retail situations.
- Trained new cashiers on transaction procedures, customer service standards, and issue-resolution practices.

PROJECTS

Real-Time Voice and Text Desktop Application <https://github.com/kyang510/dis-clone>

- Technologies: Node.js, Express.js, Socket.IO, Electron, WebRTC, bcrypt, MySQL, Docker
- Built a Discord-inspired full-stack desktop messaging platform using Electron and Node.js, supporting real-time text communication across multiple user-created channels.
- Implemented secure user authentication with bcrypt password hashing and MySQL-backed account management, including signup and login workflows.
- Engineered real-time messaging infrastructure using Socket.IO, enabling low-latency communication between multiple concurrent users.
- Containerized the application using Docker to streamline environment setup and ensure consistent cross-platform development and deployment.
- Designed and implemented dynamic channel creation, channel switching, and live synchronization of channel data across connected clients.
- Developed voice channel functionality using WebRTC peer-to-peer audio streaming, including user presence tracking, mute/deafen controls, and connection management.
- Built responsive desktop UI components with HTML, CSS, and JavaScript using an event-driven client-server architecture.

SKILLS

Languages: TypeScript, JavaScript, HTML, CSS, Python, Java, MySQL, C, C++

Frameworks & Tools: React, Node.js, Express.js, Socket.IO, WebRTC, Electron, Docker, bcrypt, Git, GitHub
